Buccaneer

PRODUCT BROCHURE

Buccaneer

WELCOME TO THE BUCCANEER WAY OF LIFE!

Thank you so much for considering the purchase of a Buccaneer.

Your boat buying decision is based on the expectation that you and your family will enjoy great days on the water, backed by reliable performance and customer service.

For 36 years, the team at Buccaneer have worked hard to meet and exceed those expectations by providing families with the ultimate boating experience. Ongoing input from Buccaneer owners and enthusiasts has enabled us to continue to build superbly designed boats with features that deliver all-day comfort and lots of family and fishing fun.

We are a long-term member of the Marine Industry Association of New Zealand, an inaugural member of the Coastguard approved NZ Boat Building Standard CPC Group and are committed to training in the boating industry. We were the main instigator for the introduction of the production trailer boats apprenticeship.

As you consider a Buccaneer boat, we urge you to ask Buccaneer owners their opinion of our products and our dealerships.

To the first retail purchaser, a one-year full marine warranty and a five-year hull structural registered warranty applies. Individual products we use on our boats have different warranties backed by those manufacturers and suppliers.

There are many upgraded features available for every Buccaneer model.

We suggest you visit your local Buccaneer dealer or come and visit our factory display to find the perfect model for you and your family, from our range of 17 models.

Happy and safe boating.

Advanced Composite Stringer Technology

Manufactured using latest composite materials

Using the latest composite adhesives, Buccaneer Boats are able to manufacture a top hat fibreglass underfloor stringer that bonds to the hull. We are able to manufacture a full fibreglass hull liner that is bonded in on top of the stringers and to the hull. The end result is a rigid hull with minimal wood in the construction; which increases longevity, whilst the polyurethane foam filled hull achieves a quieter, softer ride.
